

Hi! My name is Mary-Anne. I am 23 years old and I am from Manchester, England. I have moved back home now I have finished my degree and I live with my parents and my four younger brothers.

I spent four years studying geology at the University of Edinburgh, in Scotland, and graduated last summer. Since then, I have done various things including going out to volunteer in an orphanage in Kenya in November 2016 and working in a desert restaurant! In the future I am thinking of applying to do teaching. I also volunteer with my local Brownies unit and have lots of activity ideas to bring with me!

My family originates from Ireland, and I spent many summers there growing up.

I am always up for trying new things and I even once got into a tank with sharks when completing a sponsored shark dive for charity!

I also love to travel and experience new places, and I can't wait come to HBRA this summer!

Looking forward to meeting you all!
